

## Moon Crater Experiment

### What You Need:

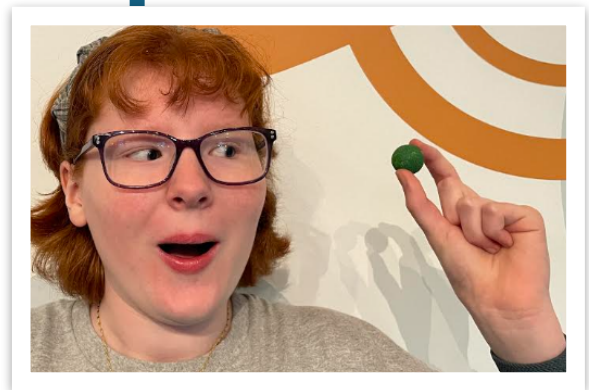

- Flour
- Cocoa powder
- A Paper Plate
- Marbles or Rocks

### How to Make it:

1. Fill a paper plate with flour and sprinkle a little cocoa on top.
2. Drop a small marble from different heights.
3. Look at the craters it makes!

### Why it Works:

- Meteors hit the Moon and leave craters, just like your marbles!
