

Paper Rockets

What You Need:

- A Sheet of Paper
- A Plastic Straw
- Tape

How to Make it:

- Roll a piece of paper into a tube slightly bigger than a straw.
- Tape into a point one end (the nose).
- Add small paper fins to the open end.
- Slide the rocket onto a straw.
- Blow into the straw to launch your rocket!

Why it Works:

- The air rushing out of the balloon pushes it forward like a rocket!
