

# At-Home Airventures

## Flashlight Constellations

### What You Need:

- Paper (cardstock or regular)
- Scissors
- Flashlight
- Pencil
- Pen or hole punch
- Tape

### How to Make it:

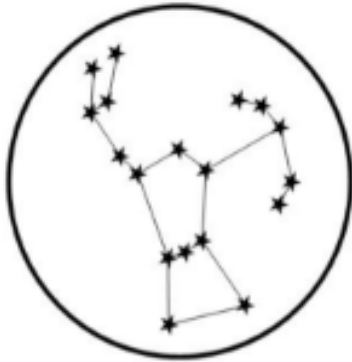

1. **Make the disc:** Trace the end of your flashlight on paper and cut out the circle.
2. **Add the constellation:** Draw your constellation on the circle.
3. **Create the stars:** Poke small holes where the stars are.
4. **Attach it:** Tape the circle over the flashlight, keeping the holes uncovered.
5. **Shine it:** Turn off the lights, switch on the flashlight, and aim it at a wall to see your constellation glow!

### Why it Works:

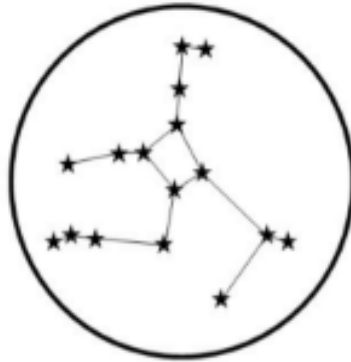

- The air rushing out of the balloon pushes it forward like a rocket!
