

Flight Paths

2025-2026

About Us

The National Aviation Hall of Fame was founded in 1962 as a nonprofit corporation in Dayton, Ohio, the Birthplace of Aviation. Two years later, NAHF was chartered nationally by an act of the U.S. 88th Congress. We continue today as a public foundation reporting annually to Congress. The primary support for NAHF comes from private, tax-deductible membership dues and contributions from individuals and organizations.

Since its founding, NAHF has faithfully fulfilled its mission to honor the tenacity, genius, and ingenuity of the people who have shaped American aviation, celebrating 283 of the nation's premier air and space pioneers.

We boldly serve as a testament that Americans who excel deserve to be recognized and their stories deserve to be documented to be used as guidance for and inspiration of future generations.

Our mission is to honor aviation and aerospace icons, perpetuate their legacy, establish a facility of excellence, and cooperate with other aviation/space organizations to ignite human curiosity, excite all generations, and cultivate the next pioneers of aviation and aerospace.

Our vision is to be the most respected institution for honoring and preserving the legacy of America's aviation and aerospace icons and to inspire and empower future generations.

"By the time I'm big, I want to work with rockets!"

—Summer camp student

From the CEO

Dear Friends of the National Aviation Hall of Fame. As I reflect on the past year, I am filled with gratitude and optimism for the future of the Hall of Fame.

In 2025, thanks to the generosity and confidence of our donors, sponsors, and supporters, we raised the resources needed to spread our wings and build a stronger foundation for growth. That investment is already making a meaningful difference.

With your continued support, the NAHF is making an impact in ways that would not have been possible just a few years ago. We are thrilled to share our 2025–2026 results and the remarkable momentum we have built together.

Over the past year, we expanded our team with talented new staff members whose energy, expertise, and passion are helping us reach more people and elevate our impact. Together, we have continued to strengthen our educational programs, inspiring students through the stories and achievements of America's aviation and aerospace pioneers. From classrooms and camps to digital learning experiences and outreach initiatives, we are connecting more young people than ever before with the innovation, perseverance, and leadership that define our Enshrinees. These programs do more than teach history. They spark curiosity, encourage exploration, and help prepare the next generation of aviation and aerospace leaders.

At the same time, we remain committed to our core mission: honoring the men and women whose contributions have shaped the course of flight and preserving their stories for future generations.

The progress highlighted in this report is a testament to what we can accomplish together. Thank you for believing in our mission and investing in our future. With your continued support, we are better positioned than ever to expand our reach, deepen our impact, and inspire generations to come.

With gratitude,

Aimee Maruyama
President & CEO

—Summer camp student

Educate

The National Aviation Hall of Fame is shaping the next generation of aviation heroes with Discovering Flight™—our signature STEM education and workforce development program.

Rooted in the powerful accomplishments of our Enshrinees, Discovering Flight™ is an ecosystem of on- and off-site learning opportunities: off-site classroom curriculum, on-site education programming in the Joe Clark Innovation Lab, summer learning opportunities, and programs to inspire girls to pursue STEM careers. Through tangible hands-on learning, and tales of adventure and innovation, Discovering Flight™ kids become the pilot, the engineer, the astronaut, and the heroes they see on the walls of the Hall of Fame. When students see themselves in our Enshrinees, they begin to realize their own potential and chart their own course in the infinite universe of aviation and aerospace.

Classroom Curriculum

Problem Solving with Wilbur and Orville is a standards-aligned **K–6 STEM curriculum** for classrooms around the country. It introduces students to the concepts that allowed the Wright Brothers to achieve powered flight, while developing creativity, critical thinking, collaboration, and problem-solving skills.

394,477*
Students Reached

*to date

Education Programs

The **Joe Clark Innovation Lab** hosts students, teachers, and families for engaging, hands-on STEM activities and aviation and aerospace workforce development programs. Our weekly Open Labs are free to museum visitors. We also we offer Lab-to-Go kits for community partners and STEM learning on our website.

37,250
Lab Visits

Summer Camps

In our week-long **Discovering Flight™ camps,** on- and off-site, students ages 6–12 develop problem-solving, teamwork, and critical-thinking skills through immersive hands-on STEM activities and by hearing the stories and achievements of National Aviation Hall of Fame Enshrinees.

Summer Campers

Wings of Women

Girls in Aviation and STEM Day is an annual event hosted at the National Museum of the U.S. Air Force. It's designed to inspire girls to explore careers in STEM fields. We connect them with professional women in STEM, provide hands-on activities, and give them insights into real-world career pathways.

660
Girls Attended

Flight Plans 2027

- Expand national impact by creating an Aviation Pathways Ecosystem Hub that will hep students discover aviation careers, connect educators with resources, and help the aerospace industry fill its workforce pipeline.
- Develop new downloadable lessons for teachers, connecting STEM learning with aviation and aerospace history and careers.
- Develop a pre-K program that introduces young children to the wonders of aviation and aerospace through age-appropriate, hands-on STEM activities and family engagement.

Preserve

In 2025, we launched a major project to digitize tens of thousands of our historical assets. Digitizing not only preserves the content of items in formats that are obsolete and in danger of deteriorating—like film reels, film slides, and printed photos—but also allows us to make images, video, and documents available to the public.

We want our members, visitors, and researchers to be able to access our collection—especially gems like the ones on this page. Thanks to a generous grant from the National Aviation Heritage Area, this year we were able to purchase a flatbed scanner and a subscription to Catalogit, the digital asset management system we'll use to organize and make our collections publicly available. Up first for digitizing are the 18,000 photos from thirty-six years of Enshrinement.

Above: Jimmy Stewart at the 1972 Enshrinement; below, left: James "Jimmy" Doolittle, military aviation pioneer who helped architect the modern air force, at the 1974 Enshrinement Ceremony—was enshrined in 1967 and attended many Enshrinement ceremonies; below, right: program signed by Jimmy Stewart

Wings of Women:
Girls in Aviation & STEM Day

The 13th annual NAHF WoW event brought over 660 girls from across the region, providing hands-on exposure to aviation and STEM careers, including a keynote from NAHF Enshrinee Joan Sullivan Garrett (bottom right), Founder and Chairman of Medaire, who highlighted the vital role of aviation medicine in supporting pilots, astronauts, and the future of flight. Monica Newman McCluney (top left), Head of Corporate Social Responsibility and the Embraer Foundation for the US at Embraer and NAHF Trustee, spoke with students during the mentoring luncheon. As a major sponsor of the 2026 Wings of Women: Girls in Aviation STEM Day, the Embraer Foundation helped provide meaningful opportunities for participants to connect with aviation and aerospace leaders.

Honor

For more than six decades, the National Aviation Hall of Fame has been enshrining the men and women who have made aviation and aerospace history—from the Wright Brothers and Amelia Earhart to General Lloyd “Fig” Newton and Eileen Collins.

At this year’s Enshrinement in Washington, D.C., we welcomed seven more legends into this prestigious group. We were honored to have NASA Administrator, The Honorable Jared Isaacman give the welcoming remarks, as well as FAA Administrator, The Honorable Bryan Bedford, Acting Deputy FAA Administrator Liam McKenna and former FAA Administrator, The Honorable T. Allan McArtor in attendance. In addition, twelve returning Enshrinees participated in this incredible evening.

The National Aviation Hall of Fame Class of 2026 with previously awarded members of the Hall of Fame. Back row, from left: Charlie Bolden, Peggy Chabrian, Eileen Collins, Robert Crippen, Ron Fogleman, Joan Sullivan Garrett, Martha King, John King, Dale Klapmeier, John Goglia, Frederick Gregory, Kathy Sullivan, Lloyd "Fig" Newton. Front row, from left: Bob Bahret (son of William Bahret), Matt Greene (grandson of Leonard Michael Greene), Bill Moore (Shannon Lucid), Diane Odegard (wife of John Odegard), Ross Perot, Jr., Patrick Harten (Chesley "Sully" Sullenberger), Peggy Whitson.

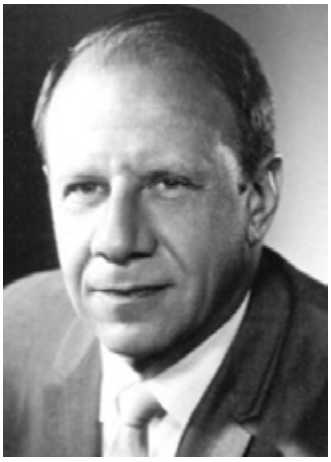

Class of 2026

(The late) WILLIAM F. BAHRET was a pioneering radar engineer at Wright Field's Avionics Lab and often called "the father of stealth." He also developed groundbreaking methods to measure and predict radar signatures based on shape and materials.

Dr. SHANNON LUCID, former astronaut and biochemist, logged over 5,300 hours in space across five missions, including a 188-day stay aboard Russia's Mir Space Station. She was among the first women to join NASA's astronaut corps and later served as NASA's chief scientist.

(The Late) LEONARD MICHAEL GREENE was a pioneering inventor and aerodynamics engineer who held over 200 patents, including the widely adopted Aircraft Stall Warning device. He also founded Safe Flight Instrument Corporation.

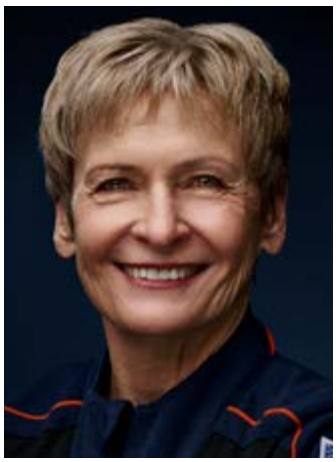

(The Late) JOHN ODEGARD founded University of North Dakota's School of Aerospace Sciences, transforming it into a global leader in pilot education, aerospace research, and space studies.

ROSS PEROT JR. is the first person to have circumnavigated the globe in a helicopter at age 23, co-piloting the Bell 206L-2 "Spirit of Texas" in 1982. A lifelong champion of aerospace innovation, he developed the nation's first purely industrial airport, Fort Worth Alliance Airport.

CAPTAIN C.B. "SULLY" SULLENBERGER is the airline captain whose quick thinking and calm leadership during the emergency landing of US Airways Flight 1549 on the Hudson River in 2009 saved all 155 people on board.

DR. PEGGY A. WHITSON is a biochemist and an astronaut whose career spans NASA and commercial human spaceflight. She flew three long-duration missions aboard the International Space Station, became the first woman to command the ISS.

Milton Caniff Spirit of Flight

THE NATIONAL AIR TRAFFIC CONTROLLERS ASSOCIATION is represented by NACTA president **NICK DANIELS** (center), with NAHF President & CEO Aimee Maruyama (left) and NAHF Vice Chair John Berry (right). NATCA's leadership in promoting safety initiatives, operational excellence, and the well-being of air traffic professionals has strengthened the foundation of U.S. aviation. Its commitment to innovation, collaboration, and service reflects a deep understanding that a safe and resilient aviation system is essential to economic growth, national security, and global connectivity.

Neil Armstrong Outstanding Achievement

BRUCE LANDSBERG (left), retired Vice Chairman of the National Transportation Safety Board, has shaped the national culture of aviation safety through decades of distinguished service. **MARK BAKER** (second from left), retired President and CEO of the Aircraft Owners and Pilots Association, has dedicated his career to expanding access to general aviation and strengthening the voice of pilots nationwide. They are pictured here with NAHF Chair Doug Schwartz (second from right) and Aimee Maruyama (right).

A. Scott Crossfield Aerospace Educator of the Year

DAN MILLS (center), with Aimee Maruyama (left) and Monica Newman McCluney (right), Head of Corporate Social Responsibility and the Embraer Foundation for the US at Embraer and NAHF Trustee, is an aviation educator at Elizabethton High School in Elizabethton, Tennessee. He has built one of the nation's most impactful high school aviation programs, combining rigorous technical instruction with a deeply personal commitment to mentorship, integrity, and character development.

Class of 2027

BOB BALARM is a visionary aerospace engineer and NASA innovator who made history with *Ingenuity*, the first aircraft to achieve powered, controlled flight on another planet. In his four-decade career, he also advanced Mars rover technology, robotic systems, and entry, descent, and landing simulations.

COL. CHARLES J. PRECOURT USAF (Ret.) is a former NASA chief astronaut, test pilot, and aerospace leader whose career advanced human spaceflight. A veteran of four space shuttle missions, he piloted *Atlantis* during the first shuttle docking with Russia's Mir space station and later served as chief of NASA's Astronaut Corps.

VERNON ESTES is an innovator, inventor, and entrepreneur in model rocketry. He founded Estes Industries and invented an automated machine that enabled the mass production of safe, affordable model rocket engines. He established model rocketry as a lasting educational tool that influences future aerospace leaders.

(The Late) JUDY A. RESNIK was a trailblazing engineer and scientist, and one of the first women chosen for the U.S. astronaut corps i 1978. She was the second American woman to fly in space, as a mission specialist on space shuttle *Discovery* in 1984, but lost her life aboard Challenger in 1986.

(The Late) NEAL V. LOVING was a pioneering pilot and aircraft designer who created the celebrated midget racer *Loving's Love*. He was the first African American certified to race airplanes, helped establish an all-Black Civil Air Patrol squadron, and co-founded the Wayne School of Aeronautics.

STEVEN F. UDVAR-HAZY is an entrepreneur and pilot who transformed the economics of commercial flight. Widely credited with pioneering modern aircraft leasing, he co-founded International Lease Finance Corporation and later, Air Lease Corporation. He also gave transformational support for the Smithsonian's Steven F. Udvar-Hazy Center.

NAHF Nominations

As the nation's only Congressionally chartered aviation hall of fame, the National Aviation Hall of Fame has a unique responsibility to recognize and preserve the legacies of individuals whose extraordinary achievements have shaped aviation and aerospace.

The NAHF Board of Nominations plays a vital role in carrying out that responsibility by identifying future generations of Enshrinees. NAHF members nominate candidates for Enshrinement, and they must meet established eligibility requirements, including that the achievements for which they are being considered occurred at least five years before nomination. Distinguished aviation and aerospace experts from across the nation participate in the selection process. Committee members carefully review eligible nomination packages and participate in an annual confidential voting process to select future classes of Enshrinees. This rigorous, thoughtful process helps ensure each class represents the extraordinary innovation, leadership, courage, and contributions that have advanced American aviation and aerospace. Through their service, committee members help the NAHF fulfill its congressionally chartered mission to honor aerospace legends and inspire future leaders.

NAHF Board of Nominations

Sean Aeran—Founder & Executive Director, Quantum Leadership Aviation

Sheryl A. Barden, CAM—Chief Executive Officer, Aviation Personnel International

Captain Jenny Beatty—Airline Pilot and Aviation Scholar

Janet R. Bednarek—Professor of History, University of Dayton

Lt Col Michael H. Bednarek, USAF (Ret.)

Captain Kandy Bernskoetter—Pilot, FedEx

Stephen Bohlig—Nominations Chairman, Minnesota Aviation Hall of Fame

Ashley Bowen Cook—Owner & CEO, Alpha Charlie Marketing

Peter Bruemmer

Daniel K. Bubb, Ph.D.—Executive Director, Nevada Aerospace Hall of Fame

J.C. Buehler—Chairman, Indiana Aviation Hall of Fame

Pete Bunce—former GAMA President & CEO

Col. Keith Butler, USAF (Ret.)—Senior Staff Coordinator, ENSCO Inc.

Emily Carney—Space Historian and Author

Katherine H. Chambers—Vice President, TENICA Global Solutions

Michael J. Cleary—Retired/Chief Health Administration Services, VA, Fayetteville, NC

James W. J. Cooling—Cooling & Herbers, P.C.

CW5 David Cooper, USA (Ret.)

William G. Creviston—VP & Sr. Portfolio Manager, Fort Washington Private Client Group

Jeffrey Daniels—Director of Aviation, IBM

Maryanne DeMarco—CEO & President, DCA International (Washington, DC)

Byron Derringer

Gary Dunn, FRAeS—President, Aviation Partners

Dr. John Gale—Strategic Advisor & Chief Compliance Officer, Ironfleet AI

Capt. Ken Ginader, USN (Ret.)

Dina Green, CMP—VP Logistics & Event Security, NBAA

M/G Mike Hall, USAF (Ret.)—PFA Consulting

Dr. Richard Hallion, FAIAA, FRAeS, FRHistS

Matt Hayes—President & CEO, The Museum of Flight

Capt. Deborah Hecker—American Airlines

Deborah Henshaw—Founding Advisor, Quantum Leadership Aviation

Lois L. Huneycutt—Associate Professor of History, University of Missouri, Columbia

Anna Italiano—Corporate Historian, The Boeing Company

Kenneth M. Keisel—Board of Nominations, NAHF

Col. Shane Kimbrough, USA (Ret.)

Dr. Jeremy R. Kinney—Associate Director, Research, Collections, and Curatorial Affairs, Smithsonian National Air and Space Museum

Russell Klingaman—Past President of the Lawyer-Pilots Bar Association (LPBA)

Rhonda Larance—President & Founder, Larance Consulting, LLC

Sean Lee—VP Global Real Estate & Facilities, Amazon

Suzanne Markle—President/CEO, Pittsburgh Institute of Aeronautics

Bruce R. McCaw—Chairman Emeritus, Pistol Creek Company

James McCormick—Board Chairman, Kentucky Aviation Hall of Fame

Capt. Terry McVenes—President, Brigadoon Aviation Solutions

Capt. Donna Miller—American Airlines (Ret.)

Miles O'Brien—Science Correspondent, PBS NewsHour, Founder, MOBIAS Media

Don Perander—Volunteer, NAHF

Darren L. Pleasance—former CEO, AOPA

Richard T. Prasse—Past Chair, National Aviation Heritage Alliance

Naveen Rao—Principal, H4 Advisors LLC- Aviation & Aerospace Policy

John P. Roundhill—Vice President, Production Strategy and Development, Boeing Commercial Airplanes (Ret.)

Louis C. Seno—Chairman Emeritus, Jet Support Services, Inc.

Wallace Trolan—Director of Aviation, Goldman Sachs

Andy Wegman—Global Head and Director of Private Aviation, BlackRock

Jill Wirth—Page, Wolfberg & Wirth, LLC

NAHF Enshrinees

Dr. Guion "Guy" Bluford, Col., USAF (Ret.)—NAHF Class of 2019

The Honorable Charles F. Bolden Jr., Maj. Gen., USMC (Ret.)—NAHF Class of 2017

Maj. Gen. Patrick Brady, USA (Ret.)—NAHF Class of 2013

Dr. Peggy Chabrian—NAHF Class of 2024

Capt. Julie Clark—NAHF Class of 2025

Col. Eileen Collins, USAF (Ret.)—NAHF Class of 2009

Capt. Robert Crippen, USN (Ret.)—NAHF Class of 2016

Gen. Jack Dailey, USMC (Ret.)—NAHF Class of 2018

Brig. Gen. Charles M. Duke Jr., USAF (Ret.)—NAHF Class of 2019

Keith Ferris—NAHF Class of 2012

Gen. Ronald Fogleman, USAF (Ret.)—NAHF Class of 2018

Capt. Robert "Hoot" Gibson, USN (Ret.)—NAHF Class of 2013

Angela Gittens—NAHF Class of 2023

The Honorable John Goglia—NAHF Class of 2025

Col. Frederick Gregory, USAF (Ret.)—NAHF Class of 2024

Fred Haise—NAHF Class of 2023

Margaret Hamilton—NAHF Class of 2022

Dr. Mae Jemison—NAHF Class of 2025

Dr. Paul Kaminski—NAHF Class of 2020

John King—NAHF Class of 2019

Martha King—NAHF Class of 2019

Dale Klapmeier—NAHF Class of 2014

Eugene "Gene" Kranz—NAHF Class of 2015

Clay Lacy—NAHF Class of 2010

Dr. Story Musgrave—NAHF Class of 2022

Gen. Lloyd W. "Fig" Newton, USAF (Ret.)—NAHF Class of 2025

Burt Rutan—NAHF Class of 1995

Patty Wagstaff—NAHF Class of 2004

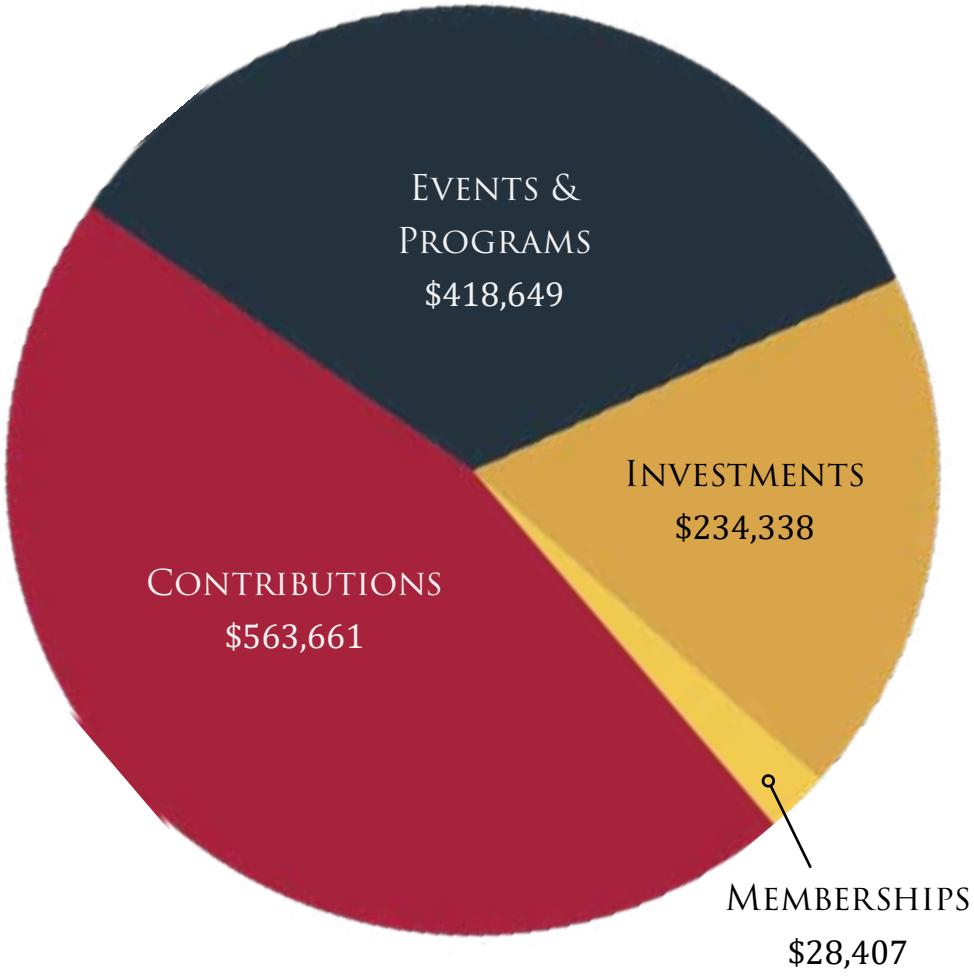

Financials

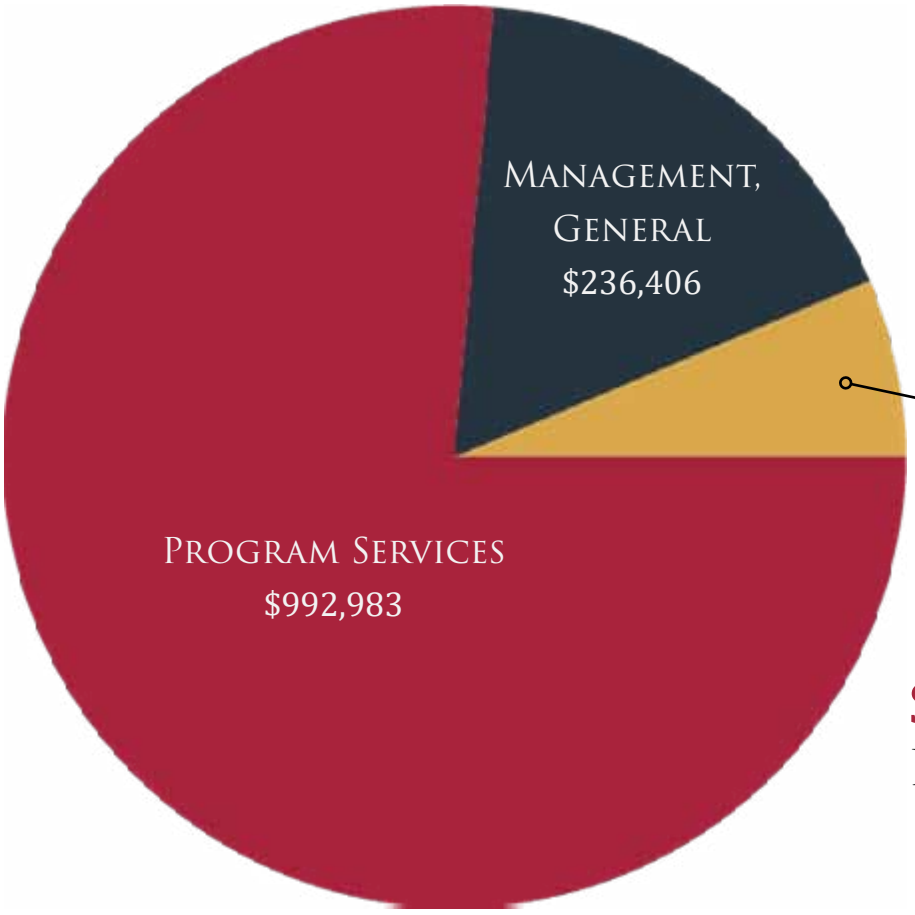

Fiscal year 2025 reflects the strength of the National Aviation Hall of Fame and the community that stands behind it.

With more than $1.2 million in total revenue, we continued to invest in excellence across our core pillars: honoring America's air and space pioneers, inspiring future generations through education, and ensuring a strong foundation for the future. Together, we are preserving extraordinary legacies while helping shape the future of aviation and aerospace.
